

Niche front with single door

NFE 209 59 H

Field of application

Electrical enclosure niche fronts made of sheet metal are used as protection of equipment for switchboards, telecommunications systems, pneumatic equipment and much more.

Product description

The niche fronts are supplied with a right-hinged door "H".
If you want a left-hinged door, replace the letter "H" with a "V" in the order number.

Material: 2 mm cold-rolled sheet.

Installation: The niche fronts are delivered in sections. With the help of the included assembly parts, the front is easily assembled on site.

Height: 2.090 mm

Width: Variable with X number of niche fronts (NF) and adjustment units (JE).

Design: The fronts are equipped with doors on concealed hinges. The doors are locked with 3-point espannolette and are normally available with a lock socket for the ASSA cylinder.

Surface treatment

NCS 0502-Y (white) or RAL 7035 (light grey)

You choose the color according to. NCS standard, Specify colour when ordering.
