

Server Cabinet ISP

ISP 200 60 95

Server cabinets with the ability to create single-access sections. Separate cable ducts for each section. Suitable for web hosting, for example.

Field of application

Floor enclosure in 2 mm welded sheet steel, with self-supporting frame, specially adapted for e.g. servers.

Product description

Optimal server cabinet for web hosting!

Three separate compartments provide flexible security solutions. The server cabinets are complete with 2 pcs. centered 19" profiles in each compartment, 12 HU in each compartment, mounted 100 mm into the cabinet. The 800 mm wide server cabinet also has mounted depth profiles with width reduction in each compartment.

Delivery incl. Support feet, set of 20 pcs. cage nuts M6 and screws and torx wrench.

Specifications of our server cabinets:

- Front: Ventilated sheet metal doors with cylinder locks (extra: electronic locks).
- The doors are right-hand electric. Left hinged (right h. std.) and can be opened 180°.
- Fixed sides and back panel.
- Roofing sheet with the possibility of cable routing at the rear edge.
- Separate cable ducts for each section for data and power cables.
- Ground connection on doors, side panels and back panels.
- Prepared with M12 threaded holes for mounting wheels, support feet or plinth.

Surface treatment

RAL 7035 (light grey), textured powder coating.
