The diagram illustrates the correct method for attaching a component to a device. A box on the right shows two options: an incorrect one with a cross (X) and a correct one with a checkmark (✓). The correct option shows a component being attached to a base with a pin labeled '3'.

The diagram illustrates the correct and incorrect ways to use a door handle. On the left, a vertical line represents the door edge. A handle is shown in a vertical position. A curved arrow indicates the correct motion: pulling the handle down and slightly to the right. On the right, a similar setup is shown, but the handle is tilted at an angle. A curved arrow indicates an incorrect motion: pulling the handle down and to the left. This incorrect motion is labeled with the letters 'EP' at both ends of the arrow.
